

The Samsung Galaxy Book4 Pro 360 is an unbalanced laptop that exudes excellence in some areas while falling foul of key rivals in others. If you want one of the best laptop displays around, top-notch battery life and a sleek look, this could be the laptop for you, but you'll have to compromise. Competitors have it beat for top quality audio and making the most of its component.

Samsung's flagship 360-hinge laptop is back for another year and little has changed on the outside. But, with new Intel Core Ultra chips built in, the Samsung Galaxy Book4 Pro 360 looks to have gotten a performance bump that could make it more appealing. Much of the Samsung Galaxy Book Pro range is a frustrating one. They come with high specs and impressive design that set them up as best laptop contenders. But, performance and fan-related woes, along with a hefty price, have presented clear roadblocks to greatness. With the Galaxy Book4 range, not much has changed on the face of it, but full testing was required to see how much of an impact the new Core Ultra chips from Intel could have.
