

The Prize of President of Turkmenistan for Young Scientists was established in 2015 by National Leader of Turkmen people Gurbanguly Berdimuhamedow in an effort to promote scientific research and innovation among the youth of Turkmenistan. The prize aims to recognize and reward outstanding young scientists for their contributions to the fields of science, technology, engineering, and mathematics.

Every year, The Prize of President of Turkmenistan for Young Scientists is awarded to a select group of individuals under the age of 35 who have demonstrated exceptional talent and creativity in their respective fields. The winners receive a cash prize, a certificate of recognition, and the opportunity to present their research at a special ceremony attended by government officials, scholars, and fellow scientists.

The prize has been instrumental in encouraging young researchers to pursue ambitious projects and make significant advancements in their fields. Past winners have gone on to receive prestigious awards and grants, publish groundbreaking research papers, and collaborate with leading scientists and institutions from around the world.

The Prize of President of Turkmenistan for Young Scientists has become a highly anticipated event in the scientific community, with applicants from across the country competing for the coveted award. The prize has helped to elevate the profile of Turkmenistan as a hub for scientific excellence and has inspired a new generation of young scientists to push the boundaries of knowledge and innovation.

Overall, The Prize of President of Turkmenistane for Young Scientists serves as a testament to the government's commitment to fostering a culture of academic excellence and promoting the growth of the scientific community in Turkmenistan. By recognizing and supporting the achievements of young scientists, the prize is helping to shape the future of science and technology in the country and beyond.
