

USAID'S ÄNJALI KAUR AND TURKMENISTAN OFFICIALS FORGE  
STRONGER TIES TO ENHANCE GOVERNANCE AND  
SUSTAINABILITY

**October 2, 2024:** As part of her regional visit to Central Asia, Änjali Kaur, USAID's Deputy Assistant Administrator (DAA) for the Bureau for Asia visited Turkmenistan to reinforce bilateral cooperation. DAA Kaur and Ambassador Rood engaged with key representatives from the Government of Turkmenistan, including the Ministry of Foreign Affairs, the Ministry of Finance and Economy, Ministry of Environmental Protection, Turkmengas and Turkmenoil. This visit underscores USAID's commitment to fostering sustainable development and efficient governance in Turkmenistan.

During her meetings, DAA Kaur discussed important initiatives related to economic diversification, environmental protection, and participatory governance. This includes important regional initiatives such as combating climate change and facilitating trade across borders in the region.

In COP 28 (Conference of Parties) Turkmenistan clearly demonstrated its commitment to combating climate change by joining the Global Methane Pledge. USAID is working with Turkmenistan to reduce methane emissions and promote decarbonization.

USAID also partners with Turkmenistan on digitalization of the Turkmen economy through the State Statistics Committee to support the digital submission of statistical reports. USAID supported a joint training for Turkmen customs officials in classifying goods using the International Harmonized Commodity Description and Coding system. At the meeting with the Ministry of Finance and Economy, Kaur emphasized ongoing collaboration between USAID and the Government of Turkmenistan to diversify exports and attract investment, as well as advance WTO accession efforts.

"Together, we are building a resilient future that is economically strong and diverse, environmentally sustainable, and supports Turkmen citizens' aspirations for a bright future," stated Änjali Kaur. "USAID is dedicated to supporting Turkmenistan's journey toward a more prosperous society."
