

On November 26, the III Turkmen-Chinese Forum “Innovations, New Technologies, and Issues of Their Implementation in Production” began its work in Ashgabat. The goal of the event is to exchange accumulated experience, discuss the implementation of advanced innovative solutions in leading sectors of the economy, and to activate scientific and technical partnership between the countries.

Participants discussed the prospects for fruitful interaction between scientists in various fields. They paid special attention to the research work being carried out in Turkmenistan and China, the creation of competitive, environmentally safe, and economically efficient high technologies.

As part of the forum, an exhibition of innovative technologies was also held. Foreign guests were able to familiarize themselves with the level of development of modern Turkmenistan, which pays special attention to the comprehensive improvement of the scientific and educational sphere.
