

Spotify has disabled the popular hacked version of the app. Goodbye,
“Spotify Mod”

In the past few days, users have reported that “Spotify Mod” has stopped working, and playlists, saved songs, and streaming capabilities have become unavailable. This move, according to media reports, is a deliberate attempt by Spotify to combat piracy.

Yes, you can find alternative modified APKs, but they may not be as safe. And in general, piracy is bad. However, the app has left Russia, so there’s no one to blame you.
