

Overall, it is about an enhanced video shooting function in low-light conditions, which can be used not only at night. According to insiders, Samsung does not plan to make major changes to the hardware of its flagship phones; most likely, the main improvements will be software-based.

However, this may require higher chip performance, which is why sources point to the use of the powerful Snapdragon 8 Elite chip. It is noted that the new Galaxy S25 Ultra is likely to become an even more versatile device for creating video content.
