

A resident of Dubai won a unique gold-plated Tesla Cybertruck

Each time people invented something interesting and new. The world of automobiles did not escape this human desire and zeal either.

Previously, people set records and innovations in other areas of the automotive industry. Some found new ways of car production, filled metal with various riches and innovations.

A unique lottery was held in Dubai, where the winner of the grand prize - a futuristic 24-karat gold-covered Tesla Cybertruck - was a 38-year-old resident of Dubai.

The lucky winner, Someswara Mungi, works as a financial technology specialist and has been living in Dubai since 2021. The unexpected win for him was the culmination of the “Buy and Win” campaign, which took place at Gold Souk Extension from November 14 to January 31. Customers received a ticket for every 500 dirhams spent at participating stores.

The Tesla Cybertruck, which has become a symbol of modern design and technology, will now adorn the streets of Dubai, and its new owner hopes that this prize will not only be a personal achievement but also an inspiration for others to do good deeds.
