

Amazfit has introduced the Bip 6 smartwatches, designed for active lifestyle users.

The new model features a 1.97-inch AMOLED display with up to 2000 nits of brightness, an aluminum alloy case, and water resistance rated at 5 ATM. Claimed battery life is up to 14 days on a single charge.

The watches are equipped with the BioTracker 6.0 sensor for monitoring heart rate, blood oxygen levels, stress, and sleep.

They support more than 140 types of workouts, including HYROX and strength training with automatic rep counting. Additionally, they offer offline navigation and round-trip routes.

Other features include Bluetooth calls, notifications, voice input for replies, and Zepp Flow voice control. The Zepp app has a new feature—food logging via camera (currently available only in North America).

The model does not support LTE or ECG but does not require a subscription. Price: \$79.99.
