

Iran Produced Over 6.2 Million Tons of Iron Ore Pellets in One Month

Iran's iron ore pellet production in the first month of the current Iranian calendar year, Farvardin (March 21 - April 21), totaled 6.248 million tons. This is 1.4% lower than the first month of the previous year, when production reached 6.339 million tons.

This figure highlights changes in Iran's metallurgy industry and overall production trends.
