

Iran's trade with the member states of the **Economic Cooperation Organization (ECO)** reached **36.2 million tons** in the **1403 Iranian calendar year**, amounting to **\$27.6 billion**, according to the **Iranian Customs Administration (IRICA)**.

- **Imports:** Iran imported **8.2 million tons** of goods from ECO countries, totaling **\$13.5 billion**.
- **Exports:** Iran exported **28 million tons** of goods to ECO countries, generating **\$14.1 billion** in revenue.
- **Growth:** Iran's non-oil exports to ECO countries increased by **38.7%** in volume and **37.5%** in value compared to the previous year.

Iran is implementing several strategies to expand trade with ECO member states:

- **Expanding trade agreements** – Signing new deals to create more favorable trade conditions.
- **Improving logistics and transport networks** – Accelerating trade flow through improved infrastructure.
- **Boosting non-oil exports** – Entering new markets to diversify economic trade.

Iran's trade with ECO countries has significantly increased over the past year. This growth strengthens regional economic cooperation and supports Iran's international trade strategy. Future developments are expected to further expand these ties and create new opportunities.
