

Recently, at Specialized Kindergarten-Park No. 21 in Mary—where Russian is taught in depth—a methodological and practical seminar was held on “The Importance of Electronic Resources in Organizing Summer Leisure Activities in Preschool Institutions.” This pedagogical event was arranged by the Mary Regional Department of Education and brought together department specialists, leading educators, methodologists, nurses, caregivers, music and song leaders, and foreign language teachers.

According to the seminar agenda, presentations covered methods crucial for the structured conduct of the summer wellness program, adherence to daily schedules, and fostering children’s joyful and healthy development. Experts’ advice on the effectiveness of using digital tools in seasonal activities and on the judicious application of methodological guidelines proved highly valuable.

It’s worth noting that the interactive programs designed by our educators Amangözel Seytekova and Güljan Tirkisheva, along with activities prepared by caregivers Oguljeren Annagulyýewa, Lale Kakabayewa, Jennet Baýramowa, Güljeren Hommadowa in collaboration with music teacher Gülbahar Cherkezowa, effectively reinforced the seminar’s

learnings. Events such as “Zoo Excursion,” “Children’s Olympic Games,” “Rare Chicks,” “Fairy-Tale Heroes in the Digital Parlor,” “Trip to Awaza,” “Journey by Transport,” and “Little Builders” showcased the children’s healthy recreation and high spirits. The implementation of the practical sessions was also reviewed.

In the Era of Revival of the New Epoch of our Glorious State, we express our boundless gratitude to our National Leader and Hero-Commander Arkadag for providing such great opportunities to enhance educational and nurturing work and to instill healthy living principles in the younger generation!

Tawus ANNAMÄMMEDOWA

Director, Specialized Kindergarten-Park
