

A 24/7 taxi call service has been launched in the city of Türkmenabat in Lebap province. The initiative was implemented jointly by the “Lebapawtoulag” Production Association and the Joint-Stock Company “Automobile Transport Service.”

Residents of Türkmenabat can access the service at any time of day by calling the short number 0655. High-quality transport services at affordable rates are guaranteed for passengers. A key feature of the “Online Taxi” service is its automated notification system: customers receive an SMS confirming their request and the estimated arrival time of the car. This makes it easier for passengers to plan their trips and eliminates the need to wait for an operator’s response.
