

A cheap Vivo T4R 5G smartphone will receive 4K quality on the front and back chamber

Vivo is preparing to release a new smartphone in India - T4R 5G. Although the exact date of the presentation has not yet been announced, details about the new product have already been included in the network. The most interesting is the camera.

The smartphone is reported to receive the MediaTek Dimensity 7400 processor and will be protected from water and dust according to IP68 and IP69 standards. He will come out in two colors: "Twilight-blue" and "Arctic-white".

The main feature will be support for video recording in 4K both on the front and main cameras. In addition, Vivo states that T4R will become the thinnest smartphone in India with a display curved on four sides - its thickness will be only 7.39 mm.

It is expected that the cost will be from 15,000 to 20,000 Indian rupees (approximately 13-18 thousand rubles).

The company has already begun an advertising campaign, and in the near future promises to reveal more details.
