

Dreame brought to the Russian market four models of blankets from the new L40: L40S Pro Ultra, L40S Ultra, L40 Ultra AE and L40 ULTRA CE. All devices combine high absorption power, automatic cleaning and improved navigation.

The line has become a flagship **L40S Pro Ultra**. It is equipped with a sixth generation Turboforce with a maximum suction power of 19,000 Pa, a 5200 mAh battery and a FOC system that reduces noise and increases stability. Thanks to the bag with a volume of 3.2 liters, the device can operate without maintenance up to 100 days. The vacuum cleaner maintains automatic mop washing at a temperature of up to 75 ° C, self -cleaning, drying with hot air and refueling with water and detergent.

Particular attention in this model is paid to caring and animal hair. The Hypertream™ Duobrush brush includes the rubber and bristly parts, which allows you to collect long hair and wool, not allowing their winding. The robot automatically regulates the revolutions of the brush depending on the type of surface and is able to adapt to difficult conditions in the house.

Autonomy is 100 days and a mop was 75 ° C - new Dreame vacuum cleaners in the Russian Federation

Dream

L40S Ultra It is focused on apartments with a complex layout. The device is equipped with an Easyleap™ system, which allows you to overcome thresholds up to 40 mm. Here is also used the Hypertream™ brush and the Vormax™ system with absorption of up to 19,000 Pa. However, compared with the flagship, there are no RGB-camera and the Roboswing system, which provides cleaning along the walls due to the movement of the case.

Dream

L40 ULTRA AE Saves the key capabilities of the flagship-such as the PowerDock TM Document with a sink at 75 ° C, automatic drying, self-cleaning and refueling, as well as a suction power of 19,000 Pa. Navigation here is simplified: only 3D lighting is used, without a camera. The user can choose one of two brushes - raised or tricutbrush 3.0.

Autonomy is 100 days and a mop was 75 ° C - new Dreame vacuum cleaners in the Russian Federation

Dream

L40 Ultra CE - The basic model is in the ruler. The absorption power is reduced to 13,000 Pa, but the main functions remain: the Tricut Brush brush, the Roboswing system and the ability to connect to the intellectual database.
