

Industrial enterprises in the Republic of Crimea completely abandoned the use of imported power tools and welding equipment. Instead of foreign components, products of local manufacturers are now purchased.

The Minister of Industry and Trade of the Republic Anushavan Agadzhanyan said that the previously necessary parts and equipment had to be brought from abroad. Now they are supplied from Crimean enterprises and are used in the production of civilian products.

Previously, the Schwabe holding (included in Rostec) [Started](#) The industrial production of a particularly pure tetrafluoride Germany at the Krasnoyarsk enterprise "Germany". This is the first production in Russia with a purity of 99.9999% necessary for the manufacture of high - quality fiber. Investments in the project amounted to 328 million rubles. New production will ensure the needs of domestic companies that produce fiber for telecommunications and 5G networks.
