

Yesterday, July 14, in our capital city, Arkadag, as well as in the regional centers of the country, the process of accepting documents from applicants to higher and secondary vocational educational institutions began.

The first day of the admission season, accompanied by extensive informational and introductory efforts among youth, demonstrated high enthusiasm from young men and women eager to gain new knowledge and contribute to the intellectual and economic strength of our homeland. For school graduates, special programs were prepared and articles published in mass media about higher and secondary vocational schools. Educational institutions also held "Open Door" days.

This year, increasing the number of students admitted to higher and specialized secondary institutions, introducing new specialties, and expanding vocational education fields will be concrete steps forward. It is also noted that entrance exams will be held from July 30 to August 25.
