

The general director of Alphabet and Google Sundar Pichai spoke about the successes of the company's AI services. At a reporting meeting for the second quarter of 2025, he said that the AI OverViews function on Google Search is now used 2 billion people a month. In May, this figure was 1.5 billion. AI OverViews shows a summary of the search results using AI and is available in 200 countries. And it turns on itself, people do not need to do anything for this.

Also II Gemini Google scored 450 million active users per month. According to Pichai, the number of daily requests for it increased by more than 50% compared to the first quarter.

AI Mode - a new way to use Google through a chat with AI - is so far only available in the USA and India, but over 100 million people per month use it.

Google also said that more than 9 million developers are already using Gemini, and over 70 million videos have been created using the VEO 3 model. The new Google Vids service to create a video from the text in WorkSpace already has about a million users per month.

In total, the company now processes 980 trillion tokens per month - twice as much as in May.
