

Infinix GT 30 Pro received only 5.5 points out of 10 for maintenance

The expert of the YouTube channel PBKreViews completely dismantled the Infinix GT 30 Pro and found out how easily various components are replaced in it during breakdown.

After removing the rear panel, you need to unscrew another 18 screws to access the internal components of the Infinix GT 30 Pro.

If you need to replace the battery, then you will have to remove the old one with isopropyl alcohol, since the battery has no tongues.
