

Lenovo introduced an inexpensive mini-PK Lecoo Mini Pro with a powerful AMD processor

Lenovo quietly released in China the new mini-PK Lecoo Mini Pro. The device is built on the AMD Ryzen 7 8745H processor and costs from 2,699 yuan (approximately \$ 377).

This chip refers to the Hawk Point series and is equipped with built-in Radeon 780M graphics. It allows you to launch modern games on low or medium settings. The device also provides up to 32 GB of rapid DDR5 RAM and two M.2 connectors for SSD-disks. Lenovo notes that the cooling system with two fans works quietly - the noise level in the "calm mode" does not exceed 32 dB.

Mini-PK offers a good set of ports:

- 2x **USB4**
- 2x **USB 3.2**
- 2x **USB 2.0**
- 2 ×**2.5G Ethernet**
- **HDMI 2.1, DisplayPort 1.4**

A 3.5 mm audio dress also supports Wi-Fi 6 and can be connected to an external video card via USB4. The case is made of aluminum, and in maximum performance mode, the system can consume up to 70 watts.

It is still unknown whether this model will appear outside of China.
