

LG introduced super -thin laptops GRAM PRO 16 and 17 with Core Ultra 9 and RTX 5050

LG introduced the new ultra -thin Gram Pro 16 and 17 2025 laptops.

Both models are focused on users who need high performance in a light and compact case. The laptops are equipped with Intel Core Ultra 9 or Ultra 7 of the second generation, the NVIDIA RTX 5050, 32 GB of RAM and a 2 TB SSD drive.

The thickness of the case is only 15 mm, and the weight is 1.36 kg of a 16-inch version and 1.5 kg in a model with a screen of 17 inches. The autonomy is declared up to 27 hours when playing the video.

Gizmochina

The main feature was the support of the branded AI instruments of LG Gram AI. They include the local assistant GRAM Chat On-Device and the cloud Gram Chat Cloud using GPT-4O.

Time Travel functions are also available to search for past activity and GRAM Link 2.0 to exchange files between laptop and smartphones. Prices in the United States start with \$ 2549, sales have already started.
