

Porn sites can play a key role in the case against *meta, which has previously been accused of mass downloading pirate books to teach their AI models.

Now, Strike 3 Holdings said that *Meta loaded and distributed their licensed videos for years for years - a minimum of 2018.

According to plaintiffs, *META used hundreds of IP addresses, some of which are registered directly to the company, and some are disguised through third-party data centers or even house connections of employees.

Thus, *Meta allegedly intentionally sat the popular “high -quality” porn to download the rest of the files faster - on the principle of exchange in the BitTorrent network.

The screenshot shows the MaxMind GeoIP search interface. At the top, there is a navigation bar with links for 'Products', 'Resources', 'Company', 'Sign In', a shopping cart icon, and a search icon. Below the navigation bar, there are three buttons: 'GeoIP web services demo', 'GeoIP databases demo' (which is highlighted in dark blue), and 'Locate my IP address'. The main search area has a text input field with the placeholder 'Enter up to 25 IP addresses separated by spaces or commas'. Below the input field, the IP address '185.89.216.251' is entered. At the bottom of this area, there is a blue button labeled 'View results'. Below the results button is a table with the following data:

Address	Location	Network	Postal Code	Approximate Latitude / Longitude*, and Accuracy Radius	ISP / Organization	Domain	Connection Type
185.89.216.251	United States (US), North America	185.89.216.0/24	-	37.751, -97.822 (1000 km)	Facebook	-	Corporate
