

In one of the issues on the YouTube channel, they found out how large the difference in the time of work between the Nothing Phone (3) and the iPhone 16 Plus, as well as which one is better.

Nothing Phone (3) with a 5150 mA batteryh (*in version for India - 5500 mAh*) and the Snapdragon 8s Gen 3 processor was compared by the time of working with the iPhone 16 Plus with a battery for 4674 mg and A18 chip. To do this, various applications were launched on smartphones, it was imitated its daily use.

According to the results of testing, the iPhone lived for about an hour longer than a competitor.
