

Philips introduced the Evnia 24M2N5200X gaming monitor with an impressive update frequency of 610 Hz.

The novelty is equipped with a 24.1-inch Fast TN matrix with a resolution of 1920 × 1080 pixels. This solution is focused on fans of jokes and e -sports games, where the high response speed and smoothness of the image are important.

The declared response time of GTG is 0.3 ms, and in maximum acceleration mode – 0.1 ms. The brightness reaches 500 threads at the peak, and the certification of Vesa DisplayHDR 400 confirms the basic support of the HDR content.

The monitor provides 99.8% of the SRGB coating and 93.6% DCI-P3, which for TN matrix is a significant improvement in terms of color rendering.

EVNIA 24M2N5200X is equipped with two HDMI 2.1 ports, one DisplayPort 1.4, USB hab (1 × usb-b, 2 × usb-a) and audio output. The cost of the novelty in China is 5999 yuan (about \$ 830).
