

Radeon RX 9060 XT has become the best video card for 1440P  
according to Notebookcheck

Notebookcheck experts recognized Radeon RX 9060 XT one of the best video cards for games in 1440p.

The Gigabyte Gaming OC version with 16 GB of video memory, built on the new RDNA4 architecture, participated in the tests. The main plus of the card is the price of \$ 349, but finding it at the recommended cost is not easy.

Among the advantages of the RX 9060 XT, a large volume of VRAM (which guarantees durability), FSR 4 support and good performance in working tasks are noted.

The card is also equipped with a standard 8-pin power connector and has a quiet work mode, which makes it convenient for most users.

Radeon RX 9060 XT has become the best video card for 1440P

Radeon RX 9060 XT has become the best video card for 1440P  
according to Notebookcheck

Notebookcheck

There are disadvantages too. First of all, it is poor performance in games with rays tracing, as well as a maximum of three displays.

In general, at a price in the area recommended \$ 349, Radeon RX 9060 XT remains the best choice for 1440P gaming.
