

New images of the expected models appeared on the Web – the Galaxy Tab S11 Ultra tablet and the Galaxy S25 Fe budget flagship. Pictures were provided by the industry insider Evan Blass. According to rumors, an imminent announcement of these devices is expected.

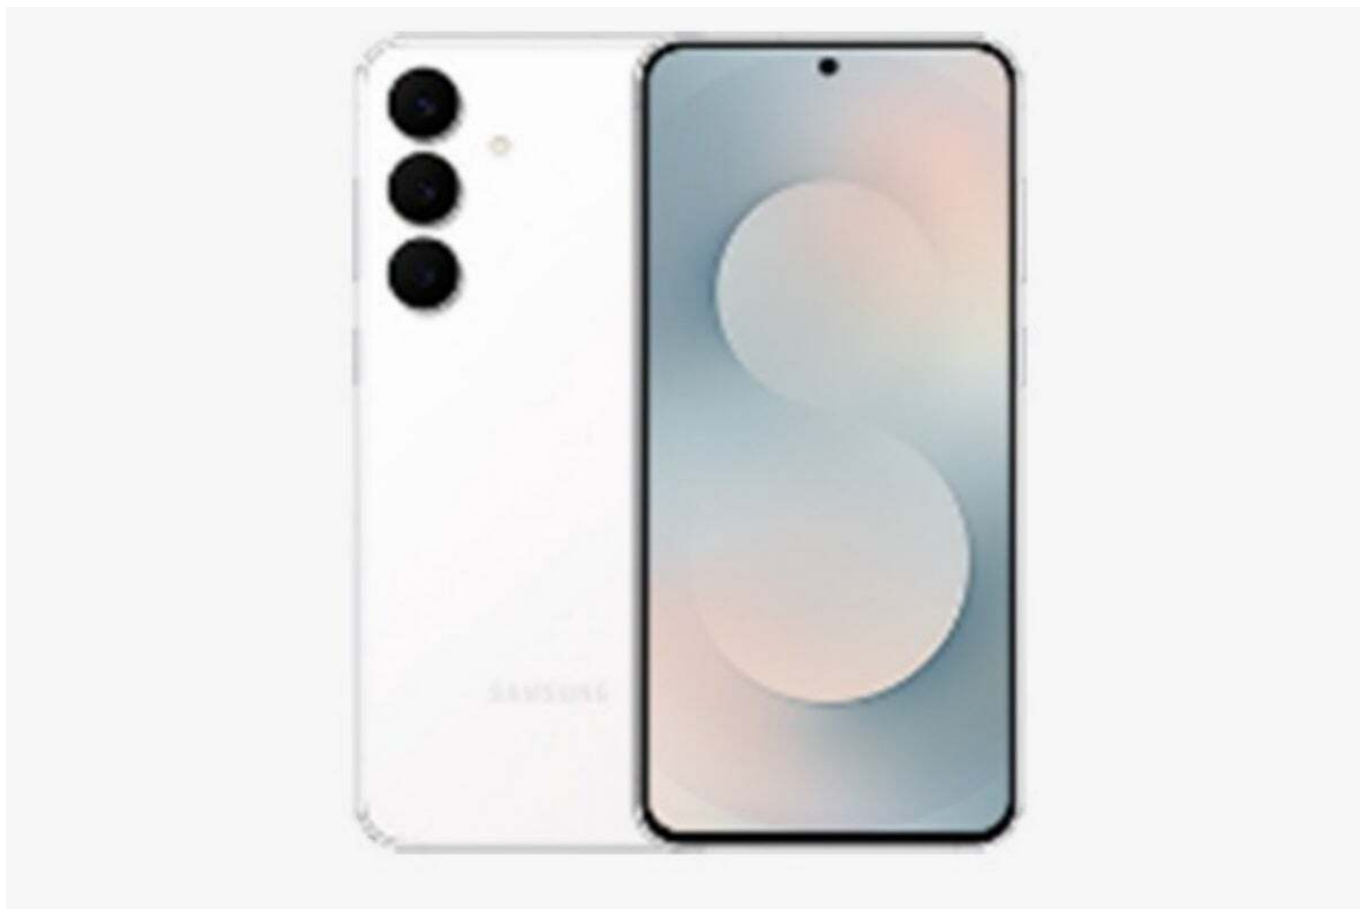

According to the Phonearena portal, the renders turned out to be in general access, not the most clear, but “100% reliable and real”. According to the leak, on the Tab S11 Ultra screen, an U-shaped neckline has been preserved, but its size is reduced compared to the Tab S10 Ultra.

Probably, the Tab S11 Ultra will be equipped with one frontal camera, which can affect the quality of the device, as it can be a decrease in hardware.

This is precisely indicated by a decrease in the size of the cutout, despite the fact that this is by no means a cheap model. At the same time, the Galaxy Tab S10 Ultra has two rear cameras, which potentially improves the quality of photos.

The Galaxy S25 Fe smartphone may be equipped with 6.7 “display (more than the base S25) and a system of three rear chambers. In addition to dark gray, S25 Fe can also be presented in white. In principle, renders confirm rumors that the Galaxy S25 Fe will be equipped with a display of the same size as the same size as the same The S24 Fe, as well as users, is waiting for “a well -known triple rear camera with a resolution of 50 + 8 + 12 megapixels.”

Renders of the Galaxy Tab S11 Ultra and smartphone Galaxy S25 Fe appeared on the network
