

Smartphone Oppo Reno14 FS Ducks on the Network: characteristics, photo and price before the announcement

The network included details about the new Oppo Reno14 FS smartphone, which should soon replenish the Reno14 series. This model will become an improved version of Reno14 F - will receive more memory and storage.

Reno14 FS will work on the Snapdragon 6 Gen 4 processor, will receive 12 GB of RAM and 512 GB built-in. On the rear panel is a triple camera: the main module of 50 megapixels (Sony IMX882 sensor), a wide-angle at 8 megapixels and a 2 megapixel macro camera. The front camera is 32 MP, built into the 6.57-inch AMOLED display with a frequency of update 120 Hz.

The battery of the smartphone is 6,000 mAh, with support for fast charging 45 watts. The weight of the device is 181 grams, the dimensions are 158.16 x 74.9 x 7.7 mm.

It is expected that the price in Europe will be € 450, but the exact date of the start of sales has not yet been disclosed.
