

The new Vivo smartphone will receive a battery for 8000 mAh

Recently, Honor introduced the X70 smartphone with the largest battery - 8300 mAh. Now it turned out that Vivo or its IQOO sub-brand is preparing a similar model with an 8000 mAh battery.

The phone with the V2507A model number has already received a certificate for sale in China. In the Geekbench base, its technical characteristics appeared. The device operates on the new MediaTek Dimensity 9400+ processor and is equipped with 16 GB of RAM. The smartphone is running Android 15.

In the Geekbench test, the smartphone scored 2882 points in a single-core mode and 8762 in multi-core. According to insiders, the model may come out under the name IQOO Z10 Turbo Pro+ and will become part of the Z10 Turbo series.

It is still unclear when exactly the novelty will appear on the market, but certification speaks of the release soon.
