

The over-access smartphone Redmi 15 5G will receive 6.9 “screen 144 Hz and a 7000 mAh battery

Xiaomi is preparing for the release an ultra -budget smartphone Redmi 15 5G, which promises to surprise with a combination of characteristics and prices.

According to the leak, the novelty will receive a huge 6.9-inch screen with a resolution of FullHD+ and the update frequency of 144 Hz-a rarity in this price segment.

The device will work on the basis of the eight-core processor Snapdragon 6s Gen 3, executed in the 6-nm technology process. The user will be offered up to 8 GB of RAM and up to 256 GB of built -in storage.

The main feature will be the 7000 mAh battery, which is noticeably larger than 5030 mAh of the predecessor - Redmi 13 5G. Supported fast exercises with a capacity of 33 watts.

7000mAh
