

Xiaomi 15t is preparing to launch - the smartphone has passed certification in Thailand

Xiaomi is preparing new smartphones - 15t and 15t Pro. Model 15T has already received certification in Thailand (NBTC) and Singapore (IMDA), which indicates an imminent launch. It is expected that the official presentation will be held in August or September.

Although certification documents do not disclose technical characteristics, according to rumors, Xiaomi 15t will receive a triple main camera:

- **basic** 50 megapixel module with an omnivision ovx8000 sensor,
- **wide -angle** 13 -megapixel camera,
- **telephone lens** On 50 MP with the Samsung ISOCELL JN5 sensor.

It is also reported that the smartphone will be equipped with a battery for 5500 mAh with support for fast charging with a capacity of 67 watts.

Details about other characteristics have not yet appeared.
