

Xiaomi has released a wireless floor wash with 4 hair protection modes and 3 cleaning methods

Xiaomi introduced a new wireless sink of the Mijia Wireless Floor Washer 4 floors, which has already entered the sale of Chinese online platforms at a price of 1499 yuan (about \$ 210).

The device combines the functions of a vacuum cleaner, washing and self -cleaning, offering users three cleaning modes: standard, antibacterial and liquid absorption mode.

The main feature of the novelty was a system of four levels of protection against hair winding. Due to the high absorption power of 18,000 Pa and the rotation speed of the brush 450 revolutions per minute, the device is effectively coping with pollution.

At the same time, the brush is pressed to the floor with increased pressure, which allows you to remove even stuck dirt.

ITHOME

The washing is equipped with the heat treatment function: hot water 80 ° C and heating to 100 ° C inside the base provide sterilization and drying of the brush. Hot soaking is implemented, providing up to 99.99% of the efficiency of removal of pollution.

The built -in 4000 mAh battery provides up to 40 minutes of battery life. The device also
