

Yandex introduced the Mini 3 Pro station with improved sound and smart home management for 11,990 rubles

Yandex officially introduced the column of Mini 3 Pro - the most affordable model with a full-fledged hub of a smart house and improved sound. The novelty has already been on sale at a price of 11,990 rubles.

The Mini 3 PA station supports all popular protocols: Zigbee, Wi-Fi and Matter Over Wi-Fi. This allows you to control smart lamps, sockets and sensors without a separate hub. At the same time, zigbee scenarios can operate offline, which was not in younger models before.

The column received an improved sound with a capacity of 18 watts with saturated bass. The compact case is equipped with passive emitters and neodymium speaker, like in older models.

Yandex

An interesting feature was the support of additional modules. You can connect an external battery (7 hours of battery life, the price of 2990 rubles) or a climatic module with temperature, humidity and Co₂, which will go on sale until the end of 2025.

Also, the column is equipped with an annular led light for visual effects and an updated design. The novelty is already available in stores and online.
