

A large -scale leak revealed the characteristics Pixel 10, Pro, Pro XL and Pro Fold a week before the presentation

A week before the official presentation, detailed characteristics of the entire Pixel 10 line flowed into the network, including Pixel 10, Pixel 10 Pro, Pixel 10 Pro XL and Pixel 10 Pro Fold.

All devices will receive a new Google Tensor G5 chip and at least 24 hours of battery life. The base Pixel 10 is equipped with a 6.3-inch Actua screen with a frequency of 120 Hz, 12 GB of RAM and a triple camera at 48, 13 and 10.8 MP with a 20-fold zoom.

Pixel 10 Pro and Pro XL will offer 16 GB of RAM, 50, 48 and 48 MP cameras, 100-fold zoom, a video of 8K and a 42 MP frontal line.

The flagship of the line-Pixel 10 Pro Fold-will receive a flexible 8-inch display of Super Actua Flex, an auxiliary screen 6.4 inches and up to 1 TB of memory.

All models support Pixelsnap wireless charging, and will also be released in new colors. Official announcement is expected on August 20, and the release is expected in the fall of 2025.
