

ASUS introduced a limited RTX 5090 series with record performance

ASUS introduced the new flagship map ROG Matrix GeForce RTX 5090 – 30th Anniversary Limited Edition. This is a special version of the RTX 5090, created for the 30th anniversary of the ASUS in the video cards market. In total, 1,000 such cards will be issued. It is probably not worth clarifying that because of this it will be extremely difficult to purchase it.

The new RTX 5090 Matrix received high frequencies up to 2,730 MHz and operates with a power of up to 800 watts using two power connectors, including a standard 16-pin and special GC-HPWR for ASUS motherboards. Productivity is promised 10% higher compared to the standard RTX 5090.

In addition to power, the card is distinguished by a unique design: black and white design and unusual body shape, resembling old models, as well as an advanced cooling system with liquid metal, four fans and copper radiators.

ASUS calls Matrix a collectible model, positioning it as an exclusive product for enthusiasts. The card made her debut on Gamescom.

The price is not declared, but it is expected that it will exceed \$ 3,000.
