

ChatGPT will become even cheaper – they found hints of subscription
for \$ 4 on the network

Openai is preparing a cheaper ChatGPT GO plan, which, as expected, was initially available only in individual countries like India. But new data show that it can be launched almost everywhere.

On the GPT Dashboard panel, some have a new Try GO button, access to which is still hidden. When choosing this option, the user is invited to pay at least \$ 4. Previously, the cost and availability was limited to India, but now the prices are indicated in dollars (\$ 4), the euro (4 €) and pounds of sterling (3.50 £).

In addition, the ChatGPT web version added a new setting “Speech speed” for the vocal regime. Using a slider, you can choose how quickly Chatgpt will say – from 0.5x to 2x normal speed.
