

Infinix introduced Hot 60i 5G after the release of 4G version in July. The novelty received the Dimensity 6400 chip, the XOS 15.1 operating system based on Android 15, 4 GB of RAM and 128 GB of internal memory, which can be expanded to 2 TB using Microsd.

The smartphone is equipped with a 6.75-inch HD+ screen with a frequency of 120 Hz and a peak of brightness 670 thread. Unlike 4G version, the resolution of a selfie camera decreased from 8 megapixels to 5 megapixels. The main camera consists of two modules, the main of which is 50 megapixels, the second is an auxiliary.

The battery is increased to 6,000 mAh (by 840 mAh more than that of the 4G version), but the charging has become slower-18 watts instead of 45 watts. There is a reverse wire charging 10 watts.

Additionally, Infinix Hot 60i 5G received AI-functions, a microSD slot, IP64 protection, IR port and a fingerprint scanner.

The smartphone is presented in four colors: Shadow Blue, Sleek Black, Monsoon Green and Plum Red. The cost is ~ 105 dollars.
