

Google began to withdraw from the sale of Pixel 6a due to a swinging battery

Recently, cases of spontaneous fire of the old Pixel 6A models have become more frequent, as reported by the 9TO5Google portal. Google has released a mandatory update that reduced the battery performance. Google also stopped selling the restored Pixel 6A due to batteries.

It emphasizes that it is mainly about Pixel 6A models. In 2024, Google temporarily stopped selling new Pixel 6A and began selling restored models for \$ 249. However, at the end of July 2024, the sales of restored devices ceased. Now Pixel 6 is the most affordable restored device with an annual guarantee.

Observers recommend not rushing with the choice of this model, especially if it is a restored device.
