

Hearing: the new flagship Redmi Note 15 Pro Plus will receive a chipset from the previous model

Gizchina insiders said that Xiaomi plans to present a series of Redmi Note 15 Plus in the coming weeks. According to them, the Pro Plus model will receive the Qualcomm Snapdragon 7s Gen 3 processor, like Redmi Note 14 Pro Plus, instead of the expected update.

It is also known that the basic Redmi Note 15 5G will switch from MediaTek to Qualcomm, but the specific model of the new chipset is still unknown. But Redmi Note 15 Pro 5G will probably use MediaTek, which will appear such a dispensed, not reported .. The version of Redmi 15 and Redmi 15 Pro with 4G support will also be released, but the information about the chipsets has not yet been confirmed.

The announcement of the series is scheduled for the end of August.
