

Huawei will probably present two new color variations for its flagship smart hours Watch 5. These devices are now available in new shades.

This was told by the Unclekanshan Insider, who suggested that soon Huawei will release two new color versions for Watch 5. These colors will be called “Green Aurora” and “Dark blue”. One of these colors has already appeared on the network: in the photo you can see a strap made of fabric similar to denim and a steel case.

The appearance of the device remained the same, but new colors provide customers with more opportunities for choosing. Unlike straps from fluoride and leather, new straps will probably be fabric, which will give the clock a sports and fashionable appearance.

Watch 5 is available in two sizes: 42 mm and 46 mm. The first size is available in light shades: Nebula Apricot, Dawn Gold, Venus White and Phantom Moon Black. The second size is in the colors of Galaxy Purple, Titanium Silver, Jupiter Brown and Black Sky.
