

In Karachay-Cherkessia, they plan to open a school for the development of youth in the field of artificial intelligence (AI) "IT-Empuls". The project received funding from a grant of Rosmolodezh won at the Coordinate tourist forum.

According to the director of the Center for Youth Projects of the North Caucasus State University Rasul Bayramukov, 200 students of the republic will be held at school. The project was developed by the SKA student Magomed Dzhukkaev and is aimed at developing skills in the field of artificial intelligence.

The educational program includes 30 hours of theoretical and 30 hours of practical classes. Students will study neural networks, machine learning and learn to apply knowledge to solve real business tasks. After completing the course, all materials will be available on the project website.

The opening of the school is scheduled for the beginning of next year. The final stage will be the holding of the IT-Empuls hacaton, after which a club for participants and all interested in artificial intelligence technologies will be created on the basis of the Academy.

The project should be implemented until April 2026.
