

In Skolkovo, the forum about drones starts: drones, exhibitions, etc.

From August 7 to 17, the International Forum "Unmanned Systems: Technologies of the Future" will be held in Skolkovo. The event was organized on behalf of the President of Russia and will become the largest site for developers, manufacturers and users of drones.

The forum will unite more than 50 thousand participants from 30 countries. Guests will see the latest Russian developments in the field of drones - air, ground and water.

From August 7 to 17, the educational intensive "Archipelago-2025" will be held with the participation of students, startups and companies. Innovations will be presented, as well as competitions and drones show, where the devices will fight, draw and perform different tasks.

From August 14 to 17, a large exhibition of unmanned and robotic technologies, open to everyone, will be held. Visitors will learn how drones help harvest, extinguish fires, monitor the forests and improve energy.

Ferra.ru

The business program will collect experts and representatives of the authorities on August 14-15. They will discuss the development of the industry, safety, certification and training.
