

Lenovo introduced two new episodes of Microsd Cart for its tablets Legion and Xiaoxin. Cards are available in four volume options up to 1 TB and they are very fast.

For its new devices, the company released memory cards optimized for different models. Legion High-Energy Gaming Microsd is offered with a volume of 256 GB, 512 GB and 1 TB with a recording speed of 60 MB/s and reading 170 MB/s. Prices are approximately \$ 22, \$ 49 and \$ 104. A 128 GB version is also mentioned, but the price is still unknown.

Xiaoxin TF Jump Card starts with 128 GB for \$ 10, and versions of 256 GB and 512 GB cost \$ 21 and \$ 42. There is also a version of 64 GB, but it has not yet arrived. Legion cards provide up to 88% of the higher reading speed and 20% faster compared to Xiaoxin.

At the moment, Lenovo has not announced whether these microSD cards will be available outside China.
