

Lunacy Another One: A game mouse with an autonomy of 100 hours on sale since August 17

M. Video-Eldorado announced the start of sales of the new Lunacy Another One game mouse. You can buy it from August 17 at a price of 11,999 rubles.

The mouse weighs only 51 grams, so it is easily controlled even with long game sessions. A built-in battery for 500 mAh provides up to 100 hours of work without recharging.

Another One is equipped with a modern Pixart sensor. The survey frequency reaches 8,000 Hz. For durability, the mouse received reliable Omron optical switches, designed for 70 million presses, as well as a dusty encoder.

The case is designed so that the mouse is convenient to keep with any grip - finger, claw or palmar.

The kit includes everything you need to start the work: a USB-resort, a cable with a convenient corner connector, spare glade (Teflon and glass), changeable linings for the best grip and a protective sticker to the bottom.
