Microsoft published a complete list of products that will be removed from support in 2025.

In addition to the already known ending of Windows 10 (October 14, 2025), this list includes Visual Studio 2015, separate versions of Windows 11, as well as a number of cloud and corporate services.

Among the solutions for Modern Lifecycle politics in 2025, Azure Database for Mariadb (September 19), Azure Basic Load Balancer, Azure SQL Edge and other Azure services (September 30) are closed.

According to Fixed LifecyCle, support will be lost to Dynamics CRM 2015, SQL Server 2012 (expanded updates), Office 2016 and 2019, Exchange Server 2016/2019, Skype for Business, Windows 10 LTSB 2015, as well as the entire Office 2016/2019 and Office and Office and Office and Office and 2019 Related applications.

Some products will go into advanced support – for example, SQL Server 2019 and Azure Devops Server 2020, which will be updated by security until 2030.
