

OnePlus 15 will be released in the “superch” color

OnePlus is preparing for release the OnePlus 15 model, which will receive noticeable changes in design. The round block of cameras will be replaced with a rectangular, displaced in the left upper corner of the rear panel. But the main feature is the new Superblack color, which, according to insiders, will become the “most black” of all that have ever been on smartphones. ”

The OnePlus 15 display is perhaps 6.78 inches, with a “1.5K” resolution (slightly lower than that of the predecessor). Screen? Apparently, high brightness, detailing and reduced energy consumption.

The smartphone will receive Snapdragon 8 Elite 2 (presentation is expected in September), a 7000 mAh battery and a triple main camera with a main sensor at 50 MP and periscopic zoom.

Official announcement is expected in the coming months.
