

A new Oppo smartphone with the PLS120 model number appeared in the Tenaa Chinese regulator. According to insiders, the device will be released under the name Oppo A6 5G. It can be presented in the near future.

The smartphone is equipped with a 6.57-inch AMOLED display with a resolution of 1080 × 2372 pixels and 10-bit support. The basis is an eight -core processor with a frequency of up to 2.4 GHz (the exact model has not yet been specified).

The memory will be represented by options for 8 and 12 GB of RAM, and the built -in storage - from 128 to 512 GB. At the same time, a microSD memory slot is available with a volume of up to 2 TB. There is a battery for 6830 mAh.

The photo is responsible for a 50-MP main camera and an additional 2-MP sensor. For selfies, a 16-MP camera is provided.

With its battery, the device turned out to be light: the thickness of the case is 8 mm, weight - only 185 g. The prints scanner in the screen, facial recognition, support of two SIM are also declared.

Oppo has not yet disclosed the price and release date.
