

Realme 15 Pro will receive a limited version in the style of “Game of Thrones”

Realme, which recently released the 15 Pro smartphone, is preparing a special limited version dedicated to the series “Game of Thrones”. The model has already passed certification in Malaysia and will appear there on sale along with the usual version.

The novelty will differ primarily from the standard 15 Pro design. In addition to the design of the case with elements from the Game of Thrones, a changed interface, as well as proprietary packaging, is expected. Perhaps there will be thematic accessories in the kit.
