

RKN did not find signs of leakage of these customers of pharmacy networks "Capital" and "Neofarm"

The press service of Roskomnadzor announced the absence of signs of compromising the personal data of customers of the pharmacy networks "Capital" and "Neofarm". This was reported by the city news agency "Moscow".

The official statement of Roskomnadzor notes: "Today we do not have signs of compromising customers of these pharmacy networks."

The agency reported this due to the fact that on July 30, as a result of the cyber attack, there was a failure in the operation of the information systems of the pharmacy networks "Cetochka" and "Neofarm", which led to the technical problems with the functioning of cash register and online booking services. For this reason, a significant number of pharmacies were forced to temporarily suspend their activities.
