

Samsung confirmed that the Galaxy Tab S11 series of tablets will be released until the end of the year. It will have only two models - Galaxy Tab S11 and S11 Ultra. Recently, the Galaxy Tab S11 Ultra received a 3C certificate in China under the number SM-X930. It is known that the tablet supports a fast wired charging with a capacity of 45 watts.

Earlier there were rumors that the Galaxy Tab S11 Ultra would work on the MediaTek Dimensity 9400+ processor and is equipped with a 11,600 mAh battery - a little more than the previous model.

Samsung also received an IMDA certificate in Singapore for the Galaxy A07 smartphone with the SM-A975F/DS model number. So far, there are few details about the phone. It is assumed that it will have a HD+ screen based on LCD, the Android 15, 6 GB of RAM and the MediaTek Helio G99 processor.

Details about the characteristics and the release date have not yet been disclosed.
