

Samsung launched One UI 8 Beta for the entire Galaxy S24 line, including S24 Ultra

Samsung launched the One UI 8 beta program for the entire Galaxy S24 line, including the Galaxy S24, S24+ and S24 Ultra models, in new regions. The day before, the update was released in South Korea and Great Britain.

The beta version of One UI 8 spreads with the firmware S92XBXU9ZYH3, weighs about 3.3 GB and contains the August Patch of 2025 security.

To participate in testing, the owners of the Galaxy S24 need to install the Samsung Members application, log in under your account, select the One UI 8 Beta Program banner and register the device.

After that, the update can be downloaded and installed through the “Settings” menu → “Update”.

In the near future, the One UI 8 Beta is planning to release for Galaxy Z Flip 6 and Z Fold 6. And next month, beta will become available for the Galaxy S23 series, as well as last year's folding models Z Flip 5 and Z Fold 5 in India, South Korea, the UK and the USA.
