

Samsung released Galaxy A17 without the announcement - Super AMOLED, IP54 and Android 15 from the box

Samsung, without unnecessary noise, released the new Galaxy A17 smartphone - the device has already appeared on sale by European retailers, despite the lack of official announcement.

The novelty has received a number of noticeable improvements compared to its predecessor. So, the Galaxy A17 is equipped with a 6.7-inch Super AMOLED screen with a resolution of FullHD+, a frequency of update 90 Hz and a peak brightness of up to 1,100 threads.

The display is protected by Gorilla Glass Victus, and the front is located 13-MP selfie camer.

Behind-50 MP The main camera with optical image stabilization, as well as a 5-MP ultra-coal-angle module and a 2-MP macro lens. The smartphone on the Exynos 1330 chip works, supports Microsd memory cards and has an IP54 dust and moisture protection degree.
